

Kidston Outdoor Learning: Seed to Plate Activities, September - February 2021

With classroom Covid guidelines in place, Seed to Plate activities have continued this school year, providing opportunities for hands-on experiential learning for Kidston kids. Activities have included: garden harvest and clean up; fall planting; cooking (famous) fries from garden potatoes, soups, cookies and biscuits. Most recently, students have been grinding flour from wheat kernels, learning important lessons about where food comes from, then turning their product into biscuits. From the seed to the plate...so much to learn!

Special thanks to Gramma D for her significant volunteer time and effort in making these programs possible. In addition, Gramma D has donated a mill (previously used) to Kidston for classroom use and future PAC Hotlunch preparations.
